The prior art of record fails to teach and/or suggest a process for manufacturing a part by shaping the part into an anode by preparing a powder containing at least one mixed oxide spinel structure which has one of its constituents as a metal in the form of cations, wherein the metal is reduced in a reduction atmosphere through the use of a carbonaceous powder material. The prior art of record sets forth that the prepared powder and binder mixture is known and that the shaping is known, along with the binder burnout and sintering sets are known, however the use of the carbon powder in the step of reducing the metal of the mixed oxide spinel in a reduction atmosphere is not known.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
